Backend Engineer – Production AI/LLM Systems • Multi-LLM Pipelines • Cloud Infrastructure (AWS/Azure)

## SKILLS

|                |                                                                                                                                      |
|----------------|--------------------------------------------------------------------------------------------------------------------------------------|
| Languages      | Python, JavaScript, TypeScript, SQL                                                                                                  |
| AI & LLMs      | Prompt Engineering, RAG (Retrieval-Augmented Generation), Multi-LLM Pipeline Orchestration (Gemini, Claude, AWS Bedrock), OpenAI API |
| Backend & APIs | FastAPI, Node.js (Express), REST APIs, Microservices                                                                                 |
| Databases      | MongoDB, Azure Cosmos DB, PostgreSQL                                                                                                 |
| Cloud & DevOps | AWS (S3), Azure (VMs, App Service, Blob Storage), GitHub Actions, Docker                                                             |
| Tools          | SuperTokens (Auth), Amazon SES, Supabase, UptimeRobot                                                                                |

## EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                               |
